A Proven Solution

COMPLETE CAMPUS SECURITY SOLUTION
VISITOR MANAGEMENT SYSTEM

PowerSchool

PowerSchool® is the leading and fastest growing student information system (SIS) available today, supporting 12 million students in all 50 states and over 65 foreign countries. Last year, more schools and districts selected PowerSchool than any other SIS product on the market. Today, PowerSchool supports a wide range of implementations – including schools as small as 25 students, districts as large as 80,000 students, and statewide deployments.

Impact to Student Achievement

The deep functions of PowerSchool allow today's educators to make real-time decisions about each student while creating a collaborative environment for parents, teachers, and students. Access to real-time information allows student performance to be addressed in a timely manner.

Easy to Learn, Easy to Use

By leveraging the latest web technologies and evolving web design standards, PowerSchool presents users with a clean interface that is easy to learn and easy to use. With over a decade of experience as a completely web-based system, PowerSchool stands alone as the deepest and most flexible SIS available to meet the needs of K-12 schools and districts. Through SIF® Compliance, an open platform, and the ability to share enhancements with other users, PowerSchool allows each customer to easily tailor the best solution for their needs.

Complete Campus Security Solution

We now provide our award winning Complete Campus Security Solution (CCSS) visitor management software to over 6,000 school locations nationwide. CCSS has been recognized by District Administration Magazine as one of the Top 100 School Products for the last three years in a row.

CCSS Meets All Your Schools Needs

CCSS has the ability to track all visitors, volunteers, employees, and substitutes that enter the campus and print a visitor badge. Tracked data can include any required information and time spent. What makes CCSS so popular is its flexibility because it can be operated in self-service (kiosk) or attendant mode, allowing schools and districts to decide what data they want to collect from up to seven different categories. Furthermore, CCSS also has a sexual offender alert.

Streamlining Visitors

CCSS allows schools to significantly improve productivity by enabling frequent visitors to log in with our JiffyPass™ RFID system. These visitors are assigned Keyfobs or custom badges allowing quick access to your school. CCSS also enables preloaded lists of volunteers, students, or staff for quick and easy tracking of volunteer hours, student tardies, or staff attendance.

Extensive Reporting

All of the data collected can be reported and monitored. For example, a one-click, real-time report to see who is in the building. Reports are also available for volunteer hours, tracking staff presence, student tardies, and more. Reports can also be exported to a CSV file for import into PowerSchool®.

Capturing Important Visitor Information

With CCSS, schools can optionally capture web images, drivers' licenses, state issued ID's, signatures, and up to four additional fields the school requires (i.e. reason of visit and location).

About Pearson

As the industry leader in SIS and performance solutions, Pearson offers schools and districts access to deep expertise and an unparalleled selection of technologies that address the challenges of achievement, reporting, growth, and scalability. Our student information systems enable schools and districts to leverage technology to ease reporting burdens, open up lines of communication, and simplify internal processes, such as scheduling and grading.

We believe that providing today's schools and districts with a choice of flexible, interoperable, and customizable technology solutions is critical to establishing the infrastructure needed to power performance across all stakeholder groups, be it schools, districts, administrators, teachers, or students.

About Ident-A-Kid

Ident-A-Kid Services of America, Inc. (ISA) has provided child safety services to parents and schools since 1986. These services are constantly utilizing new technologies to keep pace with the changing needs of parents and schools across the country.

ISA's child identification service is offered to parents of school young aged children nationwide. This consists of both a traditional driver's license like ID as well as an electronic version sent to a parent's cell phone.

ISA also provides schools with its award winning CCSS visitor management software and ParentAlert notification system.

We believe our CCSS system will enhance the productivity and safety for all its schools at a reasonable price because it's a proven system that is a culmination of feedback received from schools nationwide over the last nine years.
