

For Immediate Release

Ident-A-Kid Partners with Edclick to Improve School Efficiency

St. Petersburg, FL. (January 20, 2016) – Ident-A-kid Services of America, the nation’s leader in child safety solutions, has partnered with Edclick, a K12 software solution company, to provide PowerSchool users another level of integration for student data.

Ident-A-Kid and EdClick are now able to provide total accountability on Student attendance. With the integration of CCSS and EdClick's Student Discipline Manager, schools will be able to seamlessly track all tardies and early releases for accurate and instant records.

Discipline Manager, Edclick’s top selling software program, is a comprehensive, web-based discipline management system designed to streamline the discipline process. Discipline Manager allows schools to closely and efficiently track tardies, referrals, state reporting, and much more. By monitoring these areas schools see improved behavior, attendance and therefore receive more funding. Harry Tennant, Edclick’s CEO says “Our goal is to continue making software for educators by educators.”

Ident-A-Kid’s Complete Campus Security Solution (CCSS) visitor management system tracks all visitors on campus assuring schools that all visitors have a positive ID. In addition, CCSS has the ability to quickly process and issue passes to tardy students. Rick Hagan, Ident-A-Kid CEO said “K12 System integration is important for saving schools precious dollars and is the key to the future and this partnership demonstrates that.”

The sharing of safety and attendance data creates accurate discipline and enhanced security for all students. Schools will no longer have to manually pull reports from CCSS and enter them into Discipline manager. Both companies look forward to the added efficiency this partnership will provide to schools across the nation.

#####

Edclick, formerly Harry Tennant & Associates, Inc., was formed in 1993. In 2002, Edclick started partnering with schools to meet the desire for more effective school-related software. Each software product has been developed in close collaboration with school administrators and teachers. Edclick’s Discipline Management software is used by schools in 14 states.
